Health strengthens technical knowledge of its staff in X-rays

November 26, 2018 Berta Abrego

With the aim of training and updating the professionals of the hospitals of the National Network that have digital X-ray equipment, the Ministry of Public Health and Social Assistance (MSPAS) today developed a course that addressed issues related to the management of said equipment. .

Both the national hospitals and the Mother and Child Care Centers and Permanent Attention Centers have digital X-ray equipment, so the personnel working in them were trained in Radiological Protection (EPR), Practice Type III X-Ray, Diagnosis Doctor, among others.

The workshop was carried out with the support of the Pan American Health Organization / World Health Organization (PAHO / WHO), the Rotary Club and with the technical assistance of the Ministry of Energy and Mines (MEM).
